Jetstream Overview:
A national research and education cloud

Consortium for Computing Sciences in Colleges – Northwestern Conference
October 3, 2020 – Bloomington, IN (Webinar)

Sanjana Sudarshan, PhD – ssudarsh@iu.edu
Senior Technical Advisor, Jetstream Cloud
UITS Research Technologies
Indiana University

NSF Funding Areas in HPC

Traditionally concentrated on enabling petascale capability
- Blue Waters – 13.3 petaflops, 2012 (Frontera awarded late 2018)
- Stampede – 9.6 petaflops, 2013 (extended to Stampede2 in 2017 – 18 petaflops)
- Comet – ~2.0 petaflops, 2014

Has funded research into building clouds and computer science
- CloudLab (renewed for 2nd phase)
- Chameleon (renewed for 2nd phase)

Now funding clouds to do research
- Bridges (Hybrid system)
- Jetstream (extended to Jetstream2)
Expanding NSF XD’s reach and impact

Around 350,000 researchers, educators, & learners received NSF support in 2015

- **Less than 2%** completed a computation, data analysis, or visualization task on XD/XSEDE program resources
- Less than **4%** had an XSEDE Portal account
- **70%** of researchers surveyed* claimed to be **resource constrained**

Why are the people not using XD/XSEDE systems not using them?

- Perceived **ease of access** and use
- HPC resources – the traditional view of what XSEDE offers - are often **not well-matched** to their needs
- They just don’t need **that much** capability

*XSEDE Cloud Survey Report - http://hdl.handle.net/2142/45766
“But I really don’t have research needs...I don’t need the national research cyberinfrastructure.”

– multiple researchers at small colleges and universities
When you have to drive to work - but R has also only completed 10hrs of 24hrs worth of simulations. Can I go in the T2 lane with this thing? 😂 #rstats #sydneytraffic
What is Jetstream and why does it exist?

• NSF’s first production cloud facility
• Focus on ease-of-use, broad accessibility
• User-selectable library of preconfigured virtual machines

• Provides on-demand interactive computing and analysis or persistent services such as gateways
• Enables configurable environments; programmable cyberinfrastructure
• Reproducibility
Who uses Jetstream?

• The researcher needing a handful of cores (1 to 44 vCPUs)
• Software creators and researchers needing to create their own VMs and workflows

• Science gateway creators using Jetstream as either the frontend or processor for scientific jobs
• STEM Educators teaching on a variety of subjects
What Jetstream isn’t...

• It’s not traditional HPC
• There’s no shared filesystem (think cloudy!)
• It isn’t Amazon, Azure, or GCE (similar, but...)
HPC vs Cloud

Adapting to a different environment:

• No reservations, no queueing – more interactive usage
• Being your own admin – hey, we have root!**
• You really can have almost any (linux) software you want**

** Here there be dragons...
Jetstream and the way of the cloud...

- **Cloudy Technologies**: clouds are more than just virtual machines (VM)
- **Old way**: robust (expensive) infrastructure, weak (cheap) software
  - You expect the hardware to not fail
  - State in maintained in volatile data structures
- **Cloudy way**: commodity infrastructure, robust software
  - Expect & plan for infrastructure to fail
  - Put intelligence into the software to handle infrastructure failure
- **And my favorite...**
Thinking about VMs...

Cows, not pets: pets take great amount of care, feeding, and you name them; cows you intend to have high turnover and you give them numbers.

-- Mike Lowe (Jetstream architect)

**some caveats for gateways...
Jetstream System Overview

**Jetstream (production)**
- **Compute**: 320 Nodes, 7,680 Cores, 40 TB RAM, 640 TB local disk
- **Storage**: 960 TB

**Jetstream (production)**
- **Compute**: 320 Nodes, 7,680 Cores, 40 TB RAM, 640 TB local disk
- **Storage**: 960 TB

**Jetstream (development)**
- **Compute**: 16 Nodes, 384 Cores, 2 TB RAM, 32 TB local disk

**IU Cyberinfrastructure**

**TACC Cyberinfrastructure**

**U of Arizona Cyberinfrastructure**

**Internet2**

**XSEDE**
The Jetstream Atmosphere web interface
The Jetstream Atmosphere web interface (contd..)
Look! It’s more Jetstream web interface!
Even more Jetstream web interface...
Welcome to Ubuntu 18.04.2 LTS (GNU/Linux 4.15.0-46-generic x86_64)

System information as of Thu Mar 28 10:11:11 EDT 2019

System load: 0.0  Processes: 172
Usage of /: 52.1% of 7.58GB  Users logged in: 0
Memory usage: 31%  IP address for ens3: 172.23.17.5
Swap usage: 0%

* Read about Ubuntu updates for L1 Terminal Fault Vulnerabilities (L1TF).
  - https://ubuntu.com/l1tf

* Check out 6 great IDEs now available on Ubuntu. There may even be something worthwhile there for those crazy EMACS fans ;)
  - https://bit.ly/6-cool-IDEs

Get cloud support with Ubuntu Advantage Cloud Guest:
  http://www.ubuntu.com/business/services/cloud

* Canonical Livepatch is available for installation.
  - Reduce system reboots and improve kernel security. Activate at:
    https://ubuntu.com/livepatch

1 package can be updated.
1 update is a security update.

Welcome to

Atmosphere

**s1.* storage-rich instances are not eligible to be saved into a customized image

- Short-term *ephemeral* storage comes as part of launched instance
- Long-term storage is XSEDE-allocated
- Implemented as OpenStack Volumes and object storage
- Default storage is modest, but more is available via allocation
Newly available on Jetstream:

- 6 Dell C4140 nodes with 4 NVIDIA 16GB V100 GPUs each
- GPUs are portioned into \( \frac{1}{2}, \frac{1}{4}, \) and whole GPU and assigned to a vm
- CUDA enabled codes run accelerated and unmodified
- Card memory is divided and you have access to all the CUDA cores during your timeslices

Caveats

- Not accessible from Atmosphere
- Must use specialized drivers from us that match underlying hypervisor
- Live migration restrictions and limited numbers mean more interruptions than the rest of Jetstream
Using Jetstream VMs

Manipulating Jetstream VMs:

- Jetstream Atmosphere web interface
- Direct API access via OpenStack command line or Horizon access
  - API access enables Science Gateways and other always on services or on demand use cases; e.g. elastic compute techniques

Primary methods of logging into Jetstream VMs to work

- Interactive user access via web interface with VNC/SSH
- Direct VNC/SSH to individual instances

Jetstream for engineering researchers (and others)

- Matlab and Simulink and additional toolkits are installed on Jetstream
- You do NOT need to have a local license to use MATLAB on Jetstream
- If you are a researcher that uses MATLAB or Simulink... you’re ready to go!
- If you are an engineering researcher, and you need other tools... Let us know!
Not just the usual suspects...

Physics, chemistry, and other “usual” HPC suspects are represented, but Jetstream also is home to projects on:

• Financial analysis / Economics
• Political science
• Humanities / Text analysis
• Network analysis
• Computer Science / Machine learning
• Satellite data analysis
Jetstream for Education

- Jetstream has been used in multiple graduate and undergraduate courses
- Management, Access, and Use of Big and Complex Data
- Multiple informatics and general bioinformatics courses
- Business Intelligence (big data and analysis)

- Research Topics in Music
- Multiple genetics and sequencing courses
- Multiple information security and assurance courses

Research Data Alliance workshops, Galaxy workshops, data analysis in finance using R, security and intrusion detection, and principles in cloud computing...
Galaxy riding Jetstream

Galaxy, a platform for biomedical research, focused on accessibility, transparency and reproducibility

- usegalaxy.org has more than 100,000 registered users executing 300,000+ jobs each month
- Many users need more capacity than the public quota, or other customizations

Use Jetstream as a bursting platform

- From Galaxy Main, send jobs to a Slurm cluster running on Jetstream
- Run Galaxy Interactive Environments (Jupyter/RStudio containers) via a Swarm cluster running on Jetstream

Use Jetstream as a self-service platform

- Pre-built Galaxy image configured with hundreds of tools and access to TBs of genomic reference data, available via the self-launch model within minutes
- Allows users to acquire (free) resources, and gives them complete control
Jetstream Gateway Highlights

- **Simulations of Nanoscale Biomolecular Systems** - Aleksei Aksimentiev, University of Illinois Champaign-Urbana

- **The Neuroscience Gateway** - Amitava Majumdar, University of California, San Diego

- **Parallelizing Development of Immunomics and Genomics Tools** - Ramy Arnaout, Beth Israel Deaconess Medical Center

- **Atmospheric Science in the Cloud: Enabling Data-Proximate Science** - Mohan Ramamurthy, UNIDATA (University Corporation for Atmospheric Research)

- **Science and Engineering Applications Grid (SEAGrid): A Gateway for Simulation of Molecular and Material Structures and Dynamics** - Sudhakar Pamidighantam, Indiana University

And others!
Jetstream REU Program

NSF Supplement for undergraduates
- 4 students participated in 2017
- 6 students participated in 2018
- 7 students participated in 2019

- REU student videos on YouTube
  https://www.youtube.com/user/IUPTI
Jetstream usage highlights – 1 July 2020

- 406 active XSEDE projects covering 78 fields of science and over 2100 active users representing 206 institutions
- 80% of Jetstream users have not used any other XSEDE system
- >337M CPU hours allocated to XSEDE projects since June 2016
- 38 active science gateways
- 43 education/teaching allocations serving over 700 students currently and >4900 through July 2020
- 1189 mean active VMs in previous qtr, 1632 peak active VM count
- Highest user satisfaction in most recent XSEDE survey

Timeline

- Jetstream now in 5th year of operations
- Jetstream extension requested through November 2021
- Jetstream2
  - Early operations planned for August 2021
  - Production operations by October 2021

Flickr user Oiluj Samall Zeid - Lejos de Yulín
Requesting access to Jetstream

- Trial allocations available **TODAY**
- You can request **startup allocations anytime.** (Startups are simple!)
- You can request allocations for **educational use anytime**
- Next submission period for large allocations is 15 Sep 2020 – 15 Oct 2020
- Research allocation: Project desc (<10 pages) and Scaling doc (<5 pages)
  
  **We can help!**
