A (Brief) Jetstream Overview
A national research and education cloud

ESIP Summer Meeting 2017 - July 26, 2017 – Bloomington, IN

Jeremy Fischer – jeremy@iu.edu
Senior Technical Advisor, Jetstream
UIT S Research Technologies
Jetstream - Expanding NSF XD’s reach and impact

Lots of stats below –

**tl;dr summary: no one has enough computing resources. Ever. But they need easy access and use.**

Around 350,000 researchers, educators, & learners received NSF support in 2015

- Less than 2% completed a computation, data analysis, or visualization task on XD/XSEDE program resources
- Less than 4% had an XSEDE Portal account
- 70% of researchers surveyed* claimed to be resource constrained

Why are the people not using XD/XSEDE systems not using them?

- Perceived ease of access and use
- HPC resources – the traditional view of what XSEDE offers - are often not well-matched to their needs
- They just don’t need *that much* capability

* XSEDE Cloud Survey Report - [http://hdl.handle.net/2142/45766](http://hdl.handle.net/2142/45766)
What is Jetstream and why does it exist?

- NSF’s first production cloud facility
- Part of the NSF eXtreme Digital (XD) program
- Provides on-demand interactive computing and analysis
- Enables configurable environments and programmable cyberinfrastructure
- User-friendly, widely accessible cloud environment
- User-selectable library of preconfigured virtual machines
What is Jetstream, continued…

- Focus on ease-of-use, broad accessibility
- Command line access for those who want it and GUI access for those who don’t
- Will support persistent gateways (SEAGrid, Galaxy, GenApp NAMDRunner, CIPRES and others)
- Reproducibility: Share VMs and then store, publish via IU Scholarworks (DOI)
Who uses Jetstream?

- The researcher needing a handful of cores (1 to 44/vCPU)
- Software creators and researchers needing to create their own customized virtual machines and workflows
- Science gateway creators using Jetstream as either the frontend or processor for scientific jobs
- STEM Educators teaching on a variety of subjects
Jetstream System Overview
Platform Overview
Hardware and Instance "Flavors"

VM Host Configuration
- Dual Intel E-2680v3 “Haswell”
- 24 physical cores/node @ 2.5 GHz (Hyperthreading on)
- 128 GB RAM
- Dual 1 TB local disks
- 10GB dual uplink NIC
- Running KVM Hypervisor

- Short-term *ephemeral* storage comes as part of launched instance
- Long-term storage is XSEDE‑allocated
- Implemented as OpenStack Volumes
- Each user can get 10 volumes up to 500GB total storage*

** s1.* based instances are not eligible to be saved into a customized image
The Jetstream Atmosphere web interface

Getting Started
- Launch New Instance: Browse Atmosphere's list of available images and select one to launch a new instance.
- Browse Help Resources: View a video tutorial, read the how-to guides, or email the Atmosphere support team.
- Change Your Settings: Modify your account settings, view your resource quote, or request more resources.

Resources Used

Allocation Source
- TG-STA100024S
- TG-ASC160018
- TG-CDA160007
- TG-T2A1800003
- TG-T2A1800827

1.0 Instances
- active
- shortfall

4 Volumes
- available

Provider Resources
- Jetstream - Indiana University
- Jetstream - TACC

CPU: 2%
The Jetstream Atmosphere web interface
Look! It’s more Jetstream web interface!
Even more Jetstream web interface…
Using Jetstream VMs

Manipulating Jetstream VMs:
• Jetstream Atmosphere web interface
• Direct API access via OpenStack command line or Horizon access
  - API access enables Science Gateways and other always on services or on demand use cases; e.g. elastic compute techniques

Primary methods of logging into Jetstream VMs to work
• Interactive user access via web interface with VNC/SSH
• Direct VNC/SSH to individual instances
HPC vs Cloud

Adapting to a different environment:

- No reservations, no queueing
- More interactive use and less/no batch queueing
- What? No parallel filesystem?!?
- Being your own admin – hey, we have root!
- You really can have almost any (linux) software you want**
- Constantly getting new features (https://www.openstack.org/software/project-navigator/)

** Here there be dragons…
Thinking about VMs…

Cattle, not pets: pets take great amount of care, feeding, and you name them; cattle you intend to have high turnover and you give them numbers.

-- Mike Lowe (Jetstream architect)
Other Jetstream uses…

Matlab and 52 standard toolkits are installed on Jetstream

(You do NOT need to have a local license to use MATLAB on Jetstream)

Jetstream has been used for a number of courses and workshops to date. Ongoing classes/workshops on data analysis in finance using R, security and intrusion detection, bioinformatics, and principles in cloud computing.
Another Use Case: Galaxy riding Jetstream

Galaxy is a platform for biomedical research, focused on accessibility, transparency and reproducibility
- The main project instance (usegalaxy.org) has more than 100,000 registered users executing 300,000+ jobs each month
- Many users need more capacity than the public quota, or other customizations (e.g., new tools)

Use Jetstream as a *bursting* platform
- From Galaxy Main, offload jobs onto a remote Slurm cluster running on Jetstream instances
- Run Galaxy Interactive Environments (i.e., Dockerized IPython/RStudio containers) in an isolated environment on a Swarm cluster running on Jetstream

Use Jetstream as a *self-service* platform
- Pre-built Galaxy image configured with hundreds of tools and access to TBs of genomic reference data, available via the self-launch model within minutes
- Allows users to acquire (free) resources, and gives them complete control

funded by the National Science Foundation
Award #ACI-1445604
Allocation types and docs needed for each

• **Startup allocation (apply anytime) – “Fog a mirror”**
  - Current CV for PI and any Co-Pis
  - Brief abstract/description of work

• **Education allocation (apply anytime) – “Fog a mirror +”**
  - Current CV for PI and any Co-PIs
  - Syllabus/Class/Workshop description
  - Description of use --> justification of SUs requested

• **Research allocation (quarterly allocation window) – “A wee bit more than fog a mirror”**
  - Current CV for PI and any Co-Pis
  - Main project description (up to 10 pages unless > 15M SUs, then 15 pages)
  - Scaling doc (up to 5 pages)
Requesting access to Jetstream

• You can request startup allocations anytime. (Startups are simple!)
• You can request allocations for educational use anytime.
• Next submission period for large allocations is 15 September 2017–15 October 2017.
• We are happy to help you prepare a request and create a successful proposal.
• You do not have to have prior use of Jetstream to be successful.
Jetstream Overall Highlights

As of June 1, 2017:

• 298 active XSEDE projects covering 54 fields of science and 1900+ active users representing 165 institutions
• Over 65 million CPU hours allocated to XSEDE projects since June 2016
• 9 active science gateways
• 28 education/teaching allocations serving almost 600 undergraduate and graduate students
Jetstream Timeline…what comes next?

- Transitioned to full operations on September 1, 2016
- Soliciting Research allocation requests plus Startup and Education allocations – including Science Gateways!
- Adding services as deemed useful/mature (Heat, Magnum, Trove, Manila, etc)
- Atmosphere enhancements on a regular cycle
- Working on partnerships with groups YOURS!
Where can I get help?

User guides: https://portal.xsede.org/user-guides

XSEDE KB: https://portal.xsede.org/knowledge-base

Email: help@xsede.org

Campus Champions: https://www.xsede.org/campus-champions

Training Videos / Virtual Workshops (TBD)
