Jetstream Overview: A national research and education cloud

University of Hawai’i
February 15, 2019 – Honolulu, HI.

Jeremy Fischer – Jeremy@iu.edu - Indiana University
Senior Technical Advisor,
UITS Research Technologies

NSF Funding Areas in HPC

Traditionally concentrated on enabling petascale capability
- Blue Waters – 13.3 petaflops, 2012 (Frontera awarded late 2018, coming in 2019)
- Stampede – 9.6 petaflops, 2013 (extended to Stampede2 in 2017 – 18 petaflops)
- Comet – ~2.0 petaflops, 2014

Has funded research into building clouds and computer science
- CloudLab (renewed for 2\textsuperscript{nd} phase)
- Chameleon (renewed for 2\textsuperscript{nd} phase)

Now funding clouds to do research
- Bridges (Hybrid system)
- Jetstream
Expanding NSF XD’s reach and impact

Around 350,000 researchers, educators, & learners received NSF support in 2015
• Less than 2% completed a computation, data analysis, or visualization task on XD/XSEDE program resources
• Less than 4% had an XSEDE Portal account
• 70% of researchers surveyed* claimed to be resource constrained

Why are the people not using XD/XSEDE systems not using them?
• Perceived ease of access and use
• HPC resources – the traditional view of what XSEDE offers - are often not well-matched to their needs
• They just don’t need that much capability

*XSEDE Cloud Survey Report - http://hdl.handle.net/2142/45766
“But I really don’t have research needs...I don’t need the national research cyberinfrastructure.”

– multiple researchers at small colleges and universities
What is Jetstream and why does it exist?

- NSF’s first production cloud facility
- Focus on ease-of-use, broad accessibility
- User-selectable library of preconfigured virtual machines
- Provides on-demand interactive computing and analysis or persistent services such as gateways
- Enables configurable environments; programmable cyberinfrastructure
Who uses Jetstream?

• The researcher needing a handful of cores (1 to 44/vCPU)
• Software creators and researchers needing to create their own VMs and workflows
• Science gateway creators using Jetstream as either the frontend or processor for scientific jobs
• STEM Educators teaching on a variety of subjects
What Jetstream isn’t...

- It’s not traditional HPC
- There’s no shared filesystem (think cloudy!)
- There’s no high-end interconnect fabric (keep thinking cloudy!)
- There aren’t GPUs (yet...they’re coming!)
- It isn’t Amazon, Azure, or GCE (similar, but...)

RESEARCH TECHNOLOGIES
UNIVERSITY INFORMATION TECHNOLOGY SERVICES
HPC vs Cloud

Adapting to a different environment:
• No reservations, no queueing – more interactive usage
• Being your own admin – hey, we have root!**
• You really can have almost any (linux) software you want**

** Here there be dragons...
Jetstream and way of the cloud...

- **Cloudy Technologies**: clouds are more than just virtual machines (VM)
  - **Old way**: robust (expensive) infrastructure, weak (cheap) software
    - You expect the hardware to not fail
    - State in maintained in volatile data structures
  - **Cloudy way**: commodity infrastructure, robust software
    - Expect & plan for infrastructure to fail
    - Put intelligence into the software to handle infrastructure failure
- And my favorite...
Thinking about VMs...

Cows, not pets: pets take great amount of care, feeding, and you name them; cows you intend to have high turnover and you give them numbers.

-- Mike Lowe (Jetstream architect)

**some caveats for gateways...
Jetstream System Overview

- **IU Cyberinfrastructure**
  - Jetstream (production)
    - Compute: 320 Nodes, 7,680 Cores, 40 TB RAM, 640 TB local disk
    - Storage: 960 TB

- **TACC Cyberinfrastructure**
  - Jetstream (production)
    - Compute: 320 Nodes, 7,680 Cores, 40 TB RAM, 640 TB local disk
    - Storage: 960 TB

- **U of Arizona Cyberinfrastructure**
  - Jetstream (development)
    - Compute: 16 Nodes, 384 Cores, 2 TB RAM, 32 TB local disk

Connections:
- 4X40 Gbps
- 100 Gbps
- 10 Gbps
- Internet2
- XSEDE
Platform Overview

- Atmosphere API
- Globus Auth
- Atmo Services
- XSEDE Accounting
- OpenStack
- Ceph

</table>
Jetstream for engineering researchers (and others)

- Matlab and SimuLink and additional toolkits are installed on Jetstream
- You do NOT need to have a local license to use MATLAB on Jetstream
- If you are a researcher, and MATLAB or SimuLink... you’re ready to go!
- If you are an engineering researcher, and you need other tools... let us know!
Not just the usual suspects...

Physics, chemistry, and other “usual” HPC suspects are represented, but Jetstream also is home to projects on:

- Financial analysis / Economics
- Political science
- Humanities / Text analysis
- Network analysis
- Computer Science / Machine learning
- Satellite data analysis
Jetstream for Education

Jetstream has been used in multiple graduate and undergraduate courses

- Management, Access, and Use of Big and Complex Data
- Multiple informatics and general bioinformatics courses
- Business Intelligence (big data and analysis)
- Research Topics in Music
- Multiple genetics and sequencing courses
- Multiple information security and assurance courses

Research Data Alliance workshops, Galaxy workshops, data analysis in finance using R, security and intrusion detection, and principles in cloud computing...
Another Use Case: Galaxy riding Jetstream

Galaxy, a platform for biomedical research, focused on accessibility, transparency and reproducibility

- usegalaxy.org has more than 100,000 registered users executing 300,000+ jobs each month
- Many users need more capacity than the public quota, or other customizations

Use Jetstream as a bursting platform

- From Galaxy Main, send jobs to a Slurm cluster running on Jetstream
- Run Galaxy Interactive Environments (Jupyter/RStudio containers) via a Swarm cluster running on Jetstream

Use Jetstream as a self-service platform

- Pre-built Galaxy image configured with hundreds of tools and access to TBs of genomic reference data, available via the self-launch model within minutes
- Allows users to acquire (free) resources, and gives them complete control
Jetstream Gateway Highlights

- **Simulations of Nanoscale Biomolecular Systems** - Aleksei Aksimentiev, University of Illinois Champaign-Urbana
- **The Neuroscience Gateway** - Amitava Majumdar, University of California, San Diego
- **Parallelizing Development of Immunomics and Genomics Tools** - Ramy Arnaout, Beth Israel Deaconess Medical Center
- **Atmospheric Science in the Cloud: Enabling Data-Probimate Science** – Mohan Ramamurthy, UNIDATA (University Corporation for Atmospheric Research)
- **Science and Engineering Applications Grid (SEAGrid): A Gateway for Simulation of Molecular and Material Structures and Dynamics** – Sudhakar Pamidighantam, Indiana University
Jetstream usage highlights – 1 February 2019

• 409 active XSEDE projects covering 72 fields of science and over 2250 active users representing 196 institutions
• 80% of Jetstream users have not used any other XSEDE system
• >180M CPU hours allocated to XSEDE projects since June 2016
• 19 active science gateways
• 47 education/teaching allocations serving over 975 students
• 1288 mean active VMs in previous qtr, 1530 peak active VM count
• Highest user satisfaction in most recent XSEDE survey
Jetstream Timeline...what comes next?

• Completed our second year of operations with extension to November 2020
• Soliciting Research allocation requests plus Startup and Education allocations – including Science Gateways!
• Adding services as deemed useful/mature (Heat, Magnum, Trove, Manila, etc)
• Atmosphere enhancements on a regular cycle
• Working on partnerships with groups like HubZero and others to extend the value of Jetstream
Requesting access to Jetstream

• Trial allocations available **TODAY**

• You can request **startup** allocations **anytime**. (Startups are simple!)

• You can request allocations for **educational use** **anytime**.

• Next submission period for large allocations is **15 Mar 2019 – 15 Apr 2019**

• Research allocation: Project desc (<10 pages) and Scaling doc (<5 pages)
  • **We can help!**
Expanding the reach: Jetstream REU Program

NSF Supplement for undergraduates
- 4 students participated in 2017
- 6 students participated in 2018
- Planning for 6 in 2019

- REU student videos on YouTube
